

INTRODUCTION TO THE PROJECT *for students*

Food is a topic you have probably encountered before in your German lessons. Maybe you learned about typical German food, about buying and ordering food in the German-speaking countries. But there is so much more to food! In this project, you will not only learn that food in the German-speaking

world is much more diverse than you imagined. You will also explore the connections between the topic of food and areas such as sustainable development, creative marketing, STEM, and many more.

The project consists of three different modules:

Module 1: Schokolade

Module 2: Grün, bunt, gesund!

Module 3: Tierisch lecker?

Each module has been designed for students of German to work on independently by completing interactive worksheets and creating learning products alone or with a group. There is an obligatory part consisting of 10 worksheets with instructions for the completion of the different tasks. Through completing the tasks, you will be introduced to the topic in question and learn more about it. The completion of this obligatory part

should take about five hours. After that, there is a menu of choice, in which you can choose between different tasks, each connected to a different interdisciplinary area, such as math, STEM, advertising, debating, or design. You can work on these tasks alone or with a group. The completion of one task from the menu of choice should take about between 60 and 120 minutes (or more if you feel like it!).

TIERISCH LECKER?

LEARNING OBJECTIVES

In this project, you will work on different types of language performance, such as interpretive skills, interpersonal speaking and writing, and presentational speaking and writing. Furthermore, you will connect language learning to learning about the topic of sustainable food. Last, but not least,

you will improve your intercultural competence by learning about food in a German and global context.

MODULE 3: TIERISCH LECKER?

In this module, you will...

1. ...learn about the consumption of meat and fish in Germany.
2. ...learn about the consequences of our meat consumption on the environment.
3. ...learn about the consequences of our meat consumption on our health.
4. ...learn about animal welfare in industrial factory farming.
5. ... learn about the consequences of the industrial fishing industry.
6. ...learn about alternatives for meat, such as artificial meat.
7. ...learn about meatless diets, such as vegetarianism, veganism, or frutarism.
8. ...learn German vocabulary, chunks, and sayings connected to the topic of meat and fish.
9. ...read texts, listen to songs, and watch videos in German and answer corresponding questions.
10. ...express your opinion in German with respect to different (controversial) questions.
11. ...choose a task from our menu of project-based selectives in which you can connect the topic of meat and fish to your personal field of interest and work.

LIST OF TASKS

OBLIGATORY TASKS

(about 5 hours in total)

Worksheet 1: Tierisch lecker? - Mein Steckbrief	🕒 7 Min.
Worksheet 2: Erst das Fressen, dann die Moral - ein Lied	🕒 30 Min.
Worksheet 3: Fleischkonsum im Vergleich	🕒 20 Min.
Worksheet 4: Die Folgen unseres Fleischkonsums	🕒 35 Min.
Worksheet 5: Und die Tiere?	🕒 45 Min.
Worksheet 6: Wie gesund ist Fleisch?	🕒 45 Min.
Worksheet 7: Wie gut ist ... Fisch?	🕒 35 Min.
Worksheet 8: Künstliches Fleisch	🕒 35 Min.
Worksheet 9: Leben ohne Fleisch	🕒 35 Min.
Worksheet 10: Fleischersatz-Probe	🕒 25 Min.

MENU OF ELECTIVE TASKS

(60-120 minutes per task)

Elective Task 1: Tierisch lecker? Mathe
Elective Task 2: Tierisch lecker? Experiment
Elective Task 3: Tierisch lecker? Geschichte
Elective Task 4: Tierisch lecker? Kampagne
Elective Task 5: Tierisch lecker? Debatte (Partnerarbeit)
Elective Task 6: Tierisch lecker? Interview
Elective Task 7: Tierisch lecker? Umfrage (mit Partnerschule)
Elective Task 8: Tierisch lecker? Aktivismus
Elective Task 9: Tierisch lecker? Kunst
