

SCHOKOLADE

und andere Leckereien: vielfältig, global und nachhaltig

INTRODUCTION TO THE PROJECT *for students*

Food is a topic you have probably encountered before in your German lessons. Maybe you learned about typical German food, or about buying and ordering food in the German-speaking countries.

But there is so much more to food!

In this project, you will learn that food in the German-speaking world is much more diverse than you imagined.

You will also explore the **connections between** the topic of **food** and areas such as **sustainable development**, creative **marketing**, **STEM**, and many more.

The project consists of three different modules:

Module 1: Schokolade

Module 2: Grün, bunt, gesund

Module 3: Tierisch lecker?

Each module has been designed for students of German to work on independently by completing interactive worksheets and creating learning products alone or with a group.

There is an **obligatory part** consisting of 10 worksheets with instructions for the completion of the different tasks. Through completing the tasks, you will be introduced to the topic in question and learn more about it.

You will bring together all the information you have learned in a PowerPoint-presentation. The completion of this obligatory part should take about five hours.

After that, there is a **menu of choice**, in which you can choose between different tasks, each connected to a different interdisciplinary area, such as math, STEM, advertising, debating, or design.

You can work on these tasks alone or with a group. The completion of one task from the menu of choice should take between 60 and 120 minutes (or more if you feel like it!).

*In the fall of 2020 you can participate in the nation-wide student contest **WIE GUT IST LECKER?** Work with in a team, choose a recipe involving chocolate and create a blog entry in video, text, and image. There are attractive prizes for the winning teams and the best entries will be published on a real German foodblog! Find more information about the contest on goethe.de/lecker.*

LEARNING OBJECTIVES

In this project, you will work on different types of language performance, such as interpretive skills, interpersonal speaking and writing, and presentational speaking and writing.

Furthermore, you will connect language learning to learning about the topic of sustainable food.

Last, but not least, you will improve your intercultural competence by learning about food in a German and global context.

MODULE 1: SCHOKOLADE

In this module, you will...

1. learn about the history of chocolate.
2. learn where and how cocoa is produced.
3. find out about the environmental, social and economic consequences of non-sustainable cocoa production.
4. learn what fair trade chocolate is.
5. learn about the importance of chocolate to the German speaking world.
6. learn German vocabulary connected to the topics of chocolate and sustainability.
7. read texts, listen to songs and watch videos in German and answer corresponding questions.
8. research more in-depth information about a specific chocolate-related topic by using online sources in German.
9. prepare and present a PowerPoint presentation about your topic in German.
10. choose a task from our menu of project-based selectives in which you can connect the topic of chocolate to your personal field of interest and work.

LIST OF TASKS

OLIGATORY TASKS

(about 5 hrs in total)

Worksheet 1:

Mein Schokoladen-Steckbrief

 7 min.

Worksheet 2:

Song "Schokolade" (by Meine Freunde)

 30 min.

Worksheet 3:

Schokoladenkonsum im Vergleich Grafik

 15 min.

Worksheet 4:

Schoko-Probe

 30 min

Worksheet 5:

Die Geschichte des Kakaos

 10 min.

Worksheet 6:

Kakaoanbau

 30 min.

Worksheet 7:

Schokoladenherstellung

 30 min.

Worksheet 8:

Fair-Trade-Schokolade

 45 min.

Worksheet 9:

Verpackung

 15 min.

Worksheet 10:

Recherchieren und Präsentieren

 60-90 min.

MENU OF ELECTIVE TASKS

(60-120 min. each)

Elective task 1:

Schoko-Mathe

Elective task 2:

Schoko-Experimente

Elective task 3:

Schoko-Geschichte

Elective task 4:

Schoko-Werbung

Elective task 5:

Schoko-Debatte (Partnerarbeit)

Elective task 6:

Schoko-Interview

Elective task 7:

Schoko-Umfrage (mit Partnerschule)

Elective task 8:

Schoko-Aktivismus

Elective task 9:

Schoko-Kunst
