## HANDOUT 6.3.2 GLOBAL EFFORTS TO REDUCE CARBON OUTPUTS

First, read about efforts in the city of Freiburg to create a green economy and promote environmental progress. As you find out what has been done there, take notes on their sustainability goals, their action plan, and the possible obstacles that may have increased their challenges.

<http://www.disit.io/our-stories/indepth/germany-freiburg-sustainability-transportation-energy-green-economy.html>.

Then choose a second city anywhere in the world. Research that city's sustainability goals, action plan, and any possible obstacles that you or those involved anticipate. You may want to start your research at the United Nations Development Program website:

"Sustainable Development Goals." *Official website of the United Nations Development Program*, 2019, <http://www.undp.org/content/undp/en/home/sustainable-development-goals/>. Accessed 18 March 2019..

| City/County                                  | Sustainability Goals | Action Plan | Possible Obstacles |
|----------------------------------------------|----------------------|-------------|--------------------|
| Place #1<br><br><b>Freiburg,<br/>Germany</b> |                      |             |                    |
| Place #2                                     |                      |             |                    |
