

OUR PHOTO TIME CAPSULE

A time capsule is a container full of objects representative of the time period in which the capsule was created. The goal of a time capsule is to preserve and document our time for later generations.

In this project you will create a photo time capsule for the current year with your partner in your partner class. What has been meaningful to you this year?

YOUR TASKS

1 

What did you find noteworthy from the last year? What was new?
What was popular or trendy?
What important events happened in your country?

2 

Take and collect pictures that demonstrate these important events and objects.

3 

Contact your partner in the partner class.
Show each other the pictures and talk about how they are important to you.

4 

Choose ten pictures for your photo time capsule, which you both feel best represent the last year.
Work together to create a caption for each picture.

5 

Create a digital photo album with your pictures.

6 

Post your Photo Time Capsule online and comment on two to three other students' time capsules.
Did other groups choose similar photos?
Are there any experiences others have had which you have not had to face?
Which pictures did you find especially moving?
