

WIE SIEHT DIE ZUKUNFT DEINER STADT AUS?

In 15 afrikanischen Großstädten entwickeln junge interdisziplinäre Teams aus SpieleentwicklerInnen, ArchitektInnen, StädteplanerInnen, DesignerInnen, KünstlerInnen und IngenieurInnen location based games, in denen es um die Vergangenheit, Gegenwart und Zukunft ihrer Stadt geht.

Mit **Enter Africa** fördert das Goethe-Institut anhand von Kenntnissen analoger und digitaler Spieleentwicklung die Auseinandersetzung mit Transformationsprozessen, um diese aktiv vorauszu-denken und zu planen. Die von den Teams vor Ort entworfenen Visionen für ihre Stadt sind Gegenstand der 15 location based games, die ab Januar 2019 nach und nach gelauncht und über die digitale Plattform espoto für jedermann spielbar sein werden.

Die verschiedenen Zukunftsszenarien afrikanischer Großstädte münden schließlich in ein länderübergreifendes **analoges sowie digitales Megagame**.

Spielen Sie mit und entdecken Sie Enter Africa und das Megagame auf der Gamescom 2019.

WHAT DOES THE FUTURE OF YOUR CITY LOOK LIKE?

In 15 African mega cities, young, interdisciplinary teams including game developers, architects, city planners, designers, artists and engineers are developing location-based games which address the past, present and future of their cities.

With **Enter Africa**, the Goethe-Institut is encouraging people to use digital and analog gaming to engage with processes of transformation in cities – so as to help think through and plan the changes that are coming. The visions for the cities, created by the local teams, will be the subject of 15 location-based games which will be launched from January 2019. Everyone across the world will be able to play the games through the digital platform espoto.

The diverse future visions of African mega cities will then be developed into an international **analog and digital Megagame**.

Join the game and discover Enter Africa and the Megagame at the Gamescom 2019.
