'Pure Gold' is a travelin

This initiative of IFA is an exhibition with the theme of upcycling — the re-use of raw materials that have already been processed to create new objects of greater value — which aims to raise awareness of alternative production techniques, while simultaneously pointing

out contemporary European and non-European design developments.

The designs use what appear to be inferior starting materials, combine different kinds of objects in an unconventional way, or creatively process unwanted by-products.

The exhibition opened on Wednesday, October 23 with exhibition curator Volker Albus as special guest.

“Pure Gold” will run until November 23 at the Vargas Museum. It will be open for viewing from Tuesdays to Saturdays from 9 a.m. to 5 p.m.

The exhibition is made possible through the support of the University of the Philippines College of Arts and Letters.
