## UNIT 3 CLIMATE AND CLIMATE CHANGE: RUBRIC

## Evaluate-Scoring Rubrics

## Content Standard

| 4 <br> Advanced | $3$ <br> Proficient | Partially Proficient | 1 <br> Beginning |
| :---: | :---: | :---: | :---: |
| Student cites specific textual evidence to support analysis of science and technical texts. <br> Student compares and contrasts the information gained from experiments, simulations, video, or multimedia sources with that gained from reading a text on the same topic. <br> Student gathers relevant information from multiple print and digital sources, using search terms effectively; assesses the credibility and accuracy of each source; and quotes or paraphrases the data and conclusions of others while avoiding plagiarism and following a standard format for citation. Student reasons abstractly and quantitatively. | Student cites specific textual evidence to support analysis of science and technical texts. <br> Student compares and contrasts the information gained from experiments, simulations, video, or multimedia sources with that gained from reading a text on the same topic. <br> Student gathers relevant information from multiple print and digital sources, using search terms effectively; assesses the credibility and accuracy of each source; and quotes or paraphrases the data and conclusions of others while avoiding plagiarism and following a standard format for citation. Student reasons abstractly and quantitatively. | Student meets most, but not all, of the expectations for proficiency. | Student minimally demonstrates expectations for proficiency. |

| Student cites specific <br> effects of human | Student cites specific <br> affects of human <br> activity. |  |  |
| :--- | :--- | :--- | :--- |
| Student cites specific |  |  |  |
| activity. | Student cites specific |  |  |
| impacts of global | impacts of global <br> temperature change. <br> Student provides <br> examples of | Semperature change. <br> Student provides <br> examples of |  |
| responses to climate <br> change. <br> Student demonstrates <br> command of standard <br> responses to climate <br> change. |  |  |  |

Science and Engineering Practice

| 4 <br> Advanced | 3 <br> Proficient | 2 <br> Partially Proficient | 1 <br> Beginning |
| :--- | :--- | :--- | :--- |
| Student can ask <br> questions to identify <br> and clarify the <br> evidence of an <br> argument. | Student can ask <br> questions to identify <br> and clarify the <br> evidence of an <br> argument. | Student can ask <br> questions, but has <br> difficulty connecting <br> the questions to <br> the ability to apply <br> scientific reasoning <br> when asking <br> questions to identify <br> and clarify evidence. | Student needs <br> assistance with <br> framing questions <br> that can be used to <br> identification of the <br> evidence of an and clarify <br> evidence of an <br> argument. |

## Crosscutting Concept

| 4 <br> Advanced | 3 <br> Proficient | Partially Proficient | 1 <br> Beginning |
| :--- | :--- | :--- | :--- |
| Student can apply the <br> concept that stability <br> might be disturbed <br> either by sudden <br> events or gradual <br> changes that <br> accumulate over time <br> and can use a time <br> frame reference to an <br> explanation. | Student can apply the <br> concept that stability <br> might be disturbed <br> either by sudden <br> events or gradual <br> changes that <br> accumulate over time. | Student can partially <br> apply the concept that <br> stability might be <br> disturbed either by <br> sudden events or <br> gradual changes that <br> accumulate over time. | Student has difficulty <br> applying the concept <br> that stability might be <br> disturbed either by <br> sudden events or <br> gradual changes that <br> accumulate over time. |
