Children and War

## STARS ON THE EARTH

is a large-scale cross-sectoral socio-cultural project

## WHAT DID WE DO?

We developed a special program and conducted a 15-day inclusive film and art workshop for both children with special educational needs and neurotypical ones. And we made a documentary about it.

## WHY THIS TITLE?

“Stars on the Earth” is a metaphorical name that draws attention to the fact that all of us see the stars in the sky. But there are stars on the Earth too. These are the heroes of our project. They shine not less brightly and confidently. All you need is to look in their direction.

# SCREENWRITING

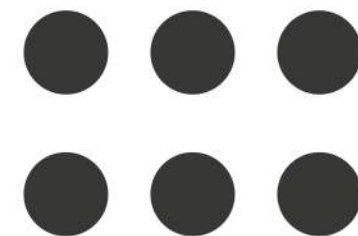

The kids invented a script for a cartoon and fairy-tale characters. They also got engaged in fairy-tale therapy.

# ARTS AND CRAFTS

The children modelled the cartoon characters from polymer clay and modelling clay, drew decorations for the cartoon

# ACTING & MUSIC

All together, they conducted a series of body-oriented exercises, worked with the breathing apparatus and articulation.

The kids got acquainted with musical instruments of different nations, learned to play them together, recorded various fairy-tale sounds for the cartoon.

# ANIMATION

The children learned about the stop motion technique and pixelation. Together they created a cartoon lasting 3 minutes.

## WHAT DID OUR HEROES LEARN?

Created an animated cartoon

Enriched their emotional, intellectual, ethical experience

Learned to adapt inside the team, communicate more confidently, share their thoughts, skills, and knowledge

Developed creativity, imagination, memory, attention, fine motor skills

Boosted interest in art, discovered their new talents

## POTENTIAL FOR COOPERATION:

conducting of a series of workshops and creation of animated films in rehabilitation centers of Ukraine and the world

## RED BACKPACKS

is a series of educational family-centred programmes. The boy named Andrii and his faithful friend, the boxer dog Ray will travel to Bessarabia in search of rare and endangered animals on the instructions of Andrii's grandfather, a scientist. On their way, Andrii and Ray photo-hunt unique animals from the Red List. They also discover new territories of Ukraine, learn many interesting things about tourism and, of course, make a lot of loyal friends.

## WHAT OUR VIEWERS WILL KNOW?

- What Ukrainian Red List animals live in Bessarabia
- What skills and equipment are essential to go on a photo hunt
- How to go on unusual, interesting and safe trips
- What exciting things, apart from unique animals, can be discovered in the South of Ukraine

# OUR RARE ANIMALS

---

Wildcat

Rosy pelican

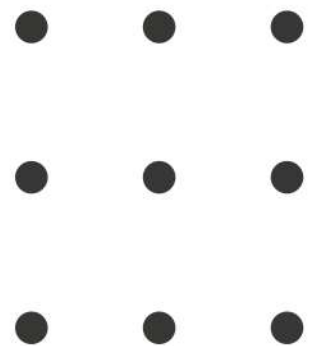

Beluga sturgeon

European roller

European honey bee

# REVIEWS

Victoria Kuchirka 10 місяців тому

Просто прекрасна серія відео для дітей! Дуже не вистачає україномовного контенту для дітей на ютубі. Величезне дякую!

Tosa Nic 10 місяців тому

Я в шоці дуже цікава передача хотілось щоб серії виходили частіше навіть учителька задала вас подивитися

# ATTENTION: CHILDREN

is a documentary project. The film consists of a series of short stories about children during the russian invasion of Ukraine. These few personal stories are an overview, a generalized picture of what Ukrainian children and their parents have to go through during the brutal and cynical war waged by russia on the territory of sovereign and independent Ukraine.

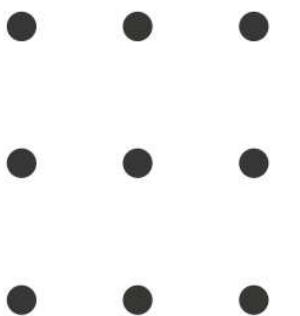

# NOVEL 1. VOVA

# NOVEL 2. UNDER OCCUPATION

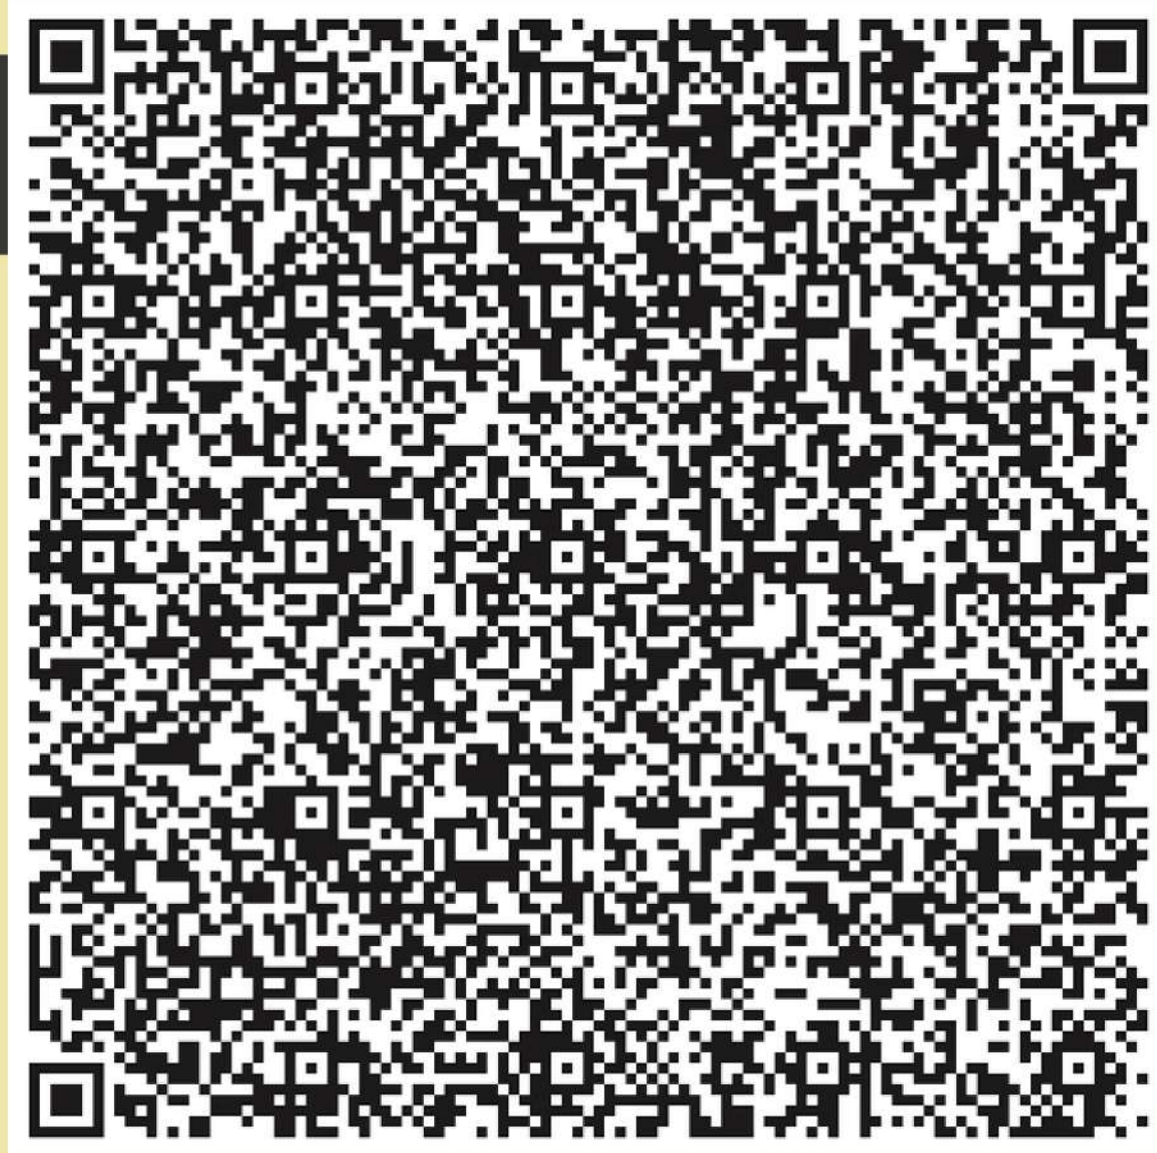

# POTENTIAL FOR COOPERATION

Looking for co-producers and partners for the creation and distribution of a documentary film, so that children's voices are heard, so that their stories are known and remembered by the whole world.

**THANK YOU**
