# SYMPOSIUM ON CLIMATE ADAPTED URBAN INFRASTRUCTURE

AT GOETHE-INSTITUT, ADDIS ABABA

9°02'51.9"N 38°45'45.5"E

- The International Symposium will reveal alternatives to current planning practices in social housing all over Africa. These alternatives shall reflect a holistic planning approach that gives priority to urban infrastructure strategies (sanitation, waste, transport) but at the same time integrates participatory design methods and urban planning.
- Practitioners, researchers, and policy makers from Europe and Africa will be working together on developing ideas for a new planning practice for Africa's housing sector through lectures, workshops, and a panel discussion.
