ID No: _____

Profession: _____

Sector: _____

Experience in profession in years: _____

Links/Social Media Handles: _____

I, _____ (NAME), hereby explicitly grant the Goethe-Institut the right to register me including my contact details under the database for female professionals in the Creative Industries in Kenya. I furthermore grant Goethe-Institut the right to forward and share my contact details with persons who express interest in acquiring the professional services of persons I have offered and which are listed in the database.

The database is administered under Goethe-Institut and will serve as a job portal for female and non-binary professionals. Companies and individuals looking to work with women/queer people in a CCI related field can request for relevant contacts, and Goethe-Institut would then provide those – if someone is looking for a female videographer, Goethe-Institut would send out all contacts of videographers registered under the database. Companies and individuals requesting are then also responsible to follow up with the contacts.

By registering to the database and signing the above, female professionals explicitly give Goethe-Institut the permission to forward their respective contacts to companies, organisations and individuals who are looking to work with them. Goethe-Institut can therefore not be held accountable or liable for any incoming requests and their contents as Goethe-Institut is merely acting as a mediator for the database. Respectively, Goethe-Institut can also not be held accountable or liable in regards to anything related to a potential engagement between companies and female professionals registered under the database. The female professionals are responsible for their work engagements themselves.

Goethe-Institut undertakes that it shall ensure the data base has the requisite and reasonable security installed to prevent/reduce security breaches from external incursions PROVIDED that the Institut shall not be held liable for any data breaches that are outside its preventive control. The Institut also undertakes not to release any of the information to the general public.

Goethe-Institut and its partners are explicitly allowed to use the database as a source for studies and research in regards to female/non-binary professionals in the CCI.
